KHALIL

DEVOPS ENGINEER

Nairobi, Kenya | github.com/walikhalil | khalilwali480@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer focused on cloud infrastructure, containerization, CI/CD pipelines, and monitoring. Experienced building and deploying modern web applications using Docker, Linux servers, and cloud platforms. Passionate about automation, system reliability, and scalable infrastructure.

TECHNICAL SKILLS

AWS
EC2, S3, IAM, VPC, Elastic IP

Monitoring
Grafana, Uptime Kuma

Frontend
React, TypeScript, Vite

Containers
Docker, Docker Hub

Infrastructure
Terraform (basic knowledge)

OS
Linux/Ubuntu Server

EXPERIENCE

DevOps Practice Projects

- Deployed React + TypeScript application to AWS EC2 using Docker.
- Built automated CI/CD pipeline using GitHub Actions to build and push Docker images.
- Configured Nginx
- Configured Nginx and container networking for production deployment.
- Implemented uptime monitoring and alerting with Grafana and Uptime Kuma.
- Integrated Telegram bot alerts for system monitoring notifications.

PROJECTS

Expense Tracker Cloud Deployment

- Full stack application using React, TypeScript, and Firebase.
- Containerized with Docker and deployed to AWS EC2.
- Implemented CI/CD pipeline to automate builds and deployments.
- Added monitoring and downtime alerts via Telegram bot.

EDUCATION

Self-taught DevOps Engineering and Cloud Infrastructure.
Focused learning on Linux administration, cloud deployment, containers, and automation.
